Profile Summary

Design and Process Excellence professional with **2+ years of experience** as a Supply Chain and Operations Analyst, with a focus on automation and data-driven optimization. Proficient in **Python, Selenium, SQL, and CI/CD practices**, leading initiatives that enhance operational efficiency and drive innovation. Experienced in building reliable automation solutions to simplify workflows and boost overall productivity.

EXPERIENCE

Supply Chain Ops Analyst Trainee Nov 2023–Present

Flipkart India Pvt. Ltd. | Patna

Product Design and Management:

- Conceptualized and deployed **Density-Based Clustering (DBC), In-House Time (IHT) & One-Touch Runsheet (OTRS)** Models, Auto-Sortation systems at last-mile hubs, leading to a **reduction of 54 minutes in In-Hub Time (IHT)** and a **2.88% increase in EMD performance** across **300+ hubs**.
- Designed and rolled out a **Serviceability Manager tool**, enhancing **shipment landing precision** and bringing down **misroute rates** from **8% to 0.4%**.

Program Management:

- Spearheaded the implementation of **Handheld Devices (HHD)** across **200+ Last Mile hubs**, collaborating with the **product team** for functional enhancements.
- Successfully scaled the adoption of HHDs in two phases, reducing the need for additional fixed systems and saving approximately **11 lakh** during the **May sale peak** period by optimizing **asset utilization**.
- Designed and implemented **IPC (Intermediate Processing Center)** in **Bihar & Jharkhand**, resulting in **monthly savings** of approximately **3.7 lakh** in **infrastructure costs** and **42K** in **manpower optimization** at **last-mile nodes**.
- Designed and implemented a **Biker Model** for **addressing low address accuracy** across **20+ misroute-prone hubs**, reducing **Customer Promise Date breaches** by **2.57%**.

Big Billion Days / BAU Planning–E2E Planning & Design:

- Responsible for **E2E IT assets planning** and **execution** to ensure smooth operations during **Big Billion Days** and **BAU days**.
- Design the clusters for DHs using **Serviceability Manager tool** for **precision** and **accurate landing** to save **Manhours by 1 Hour** and increase **EMD (Early Morning Delivery)** by **2%** during Big Billion Days and BAU.

Automation:

- Streamlined the tracking process of multitrack shipment data within **Flipkart's ERP**, **reducing manual effort by 1.5 hours** daily and enabling efficient processing of over **100,000 TIDs**, which improved **operational visibility** and **overall productivity**.
- Designed and implemented **automated data workflows** leveraging **Google Apps Script, Google Sheets API, Python, SQL, Selenium, and Git** to process large datasets and create real-time dashboards, significantly enhancing **data visibility**, reducing escalations, reduce manual intervention, improve adherence and accelerating **informed decision-making** across operations teams.
- Simplified and analyzed large-scale datasets by automating database processes using **Python (Pandas, NumPy)** to deliver actionable insights.
- Enabled data visibility and communication through **automated emails and AI-powered bots**, ensuring timely updates via **Google Hangouts** and enhancing collaboration across teams.

Summer Intern May 2022–Jun 2022

BSNL | Bhubaneswar

- Gained hands-on experience in **Advanced IP and Networking models**, including in-depth training on **IPv4, IPv6 addressing, router configuration**, and **network design** using **Cisco Packet Tracer**.
- Enhanced **Python programming** skills through practical applications and projects, enriching technical proficiency in scripting and **network automation fundamentals**.

EDUCATION

B.Tech in Electronics And Communication Engineering

Sambalpur University Institute Of Information Technology | Sambalpur, Odisha Aug 2019–May 2023

CGPA – 7.9 | Percentage – 75%

Projects

Smart Health Care Monitoring System Based on IoT

- Built an **IoT-based health monitoring system** to track vital parameters like **temperature, oxygen level, and ECG**.
- Integrated sensors (**LM35, MAX30100, ECG**) and used **NodeMCU** to transmit real-time data to **ThinkSpeak**.
- Enabled **continuous, cloud-based monitoring**, improving **remote healthcare tracking**.

Technologies Used: Arduino Mega, NodeMCU, ThinkSpeak, LM35, MAX30100, ECG Sensor

GitHub: <https://github.com/subumohanty/HealthMonitoringSystem>

Portfolio Website

- Designed and developed a **personal portfolio website** to showcase **projects and achievements**.
- Integrated **interactive UI elements** to improve **user experience** and **engagement**.
- Demonstrates **front-end development skills** and strong design sense.

Technologies Used: HTML, CSS, Javascript

GitHub: <https://github.com/subumohanty/Subbasis-Portfolio>

Misroute Debugging Tool

- Built a tool to identify the **actual shipment hub** and detect **short address shipments** through accurate **lat & long** based geolocation analysis.

Technologies Used: OSRE, Python, JavaScript, GMap API, GDrive API, HTML, CSS, SQL

Web-Based Pincode/District Level GMap GeoPolygons Tool

- Developed an accurate **Pan-India GeoPolygon tool** at pincode/district level, successfully implemented in **Flipkart's Internal GeoPolygon Tool** for precise geographic mapping.

Technologies Used: JavaScript, Python, GMap API, GDrive API, HTML, CSS

Cluster Predicted Polygon Tool

- Created a tool to generate **WM-wise polygons** inside the geofence of hubs based on **delivered lat & long** data, enabling precise cluster boundary prediction.

Technologies Used: Python, OSRE, JavaScript, HTML, CSS, SQL

Short Address Prediction Tool

- Built a predictive tool to identify **short address shipments** in everyday landings, processing **5L+ shipments** daily to improve delivery accuracy and reduce misroutes.

Technologies Used: Python, SQL

ACHIEVEMENTS

International Conference / Research Paper:

S. Mohanty, S.S Mohanty and P.K. Mishro, "An IOT based Model for Monitoring Health Parameters using Arduino Mega," in proceedings of International Conference on Computing, Communication and Networking (ICCCNT 2023), IIT Delhi, pp.1-5, 2023. IEEE. Link:

TECHNICAL SKILLS

Tools: VS Code, Power BI, Microsoft Office Suite, Google Suite

Programming Languages: JavaScript, Python, SQL

Automation & Data Processing: Selenium, Pandas, NumPy, PySpark, GUI Automation

Cloud & BI Tools: Tableau, Power BI, and Plotly with Python

OS: Windows and Linux
